

## Product Description

The Mini cart is a slimmer version of the Harmony cart. Designed for tight spaces such as patient bedside, under-counter, patient rooms, exam rooms, and small 'cubby' areas. We've slimmed down the aluminum on the rails and modified the base and the work surface. The electronic lock option (VEL) has moved to the front. The casters are three inch poly full swivel plate casters, two with brakes and one tracking. Adding side mounted accessories such as waste basket and sharps container is still an option. The drawer size remains the same so the cart accepts the standard InnerSpace tray/divider system. The Mini has a 21" drawer capacity. It comes standard with a central key lock.

## Product Specifications
