

ECP Cart with Cell System

3625ECP

The 3625ECP cart is ideal for cath labs, special procedures and operating rooms. Extending wings operate independently of one another and increase the work surface area with ease. The cell system compartment can accommodate 24"D (61 cm) accessories or the 3600AP to store even more supplies. The cell system has nine usable cells, three per column. The drawers are divided with four dividers each to provide storage for up to 10 varieties of catheters/introducers.

Accessories sold separately.

Product Specifications

PB0027
